administrators researchers and policy makers to evaluate and formulate academic standing and growth recently nwea completed a concordance study to connect the scales of act' aspire reading and math with those of the map reading and map for mathematics assessments this report presents the 3rd through 8th grade cut scores on map reading and mathematics scales that correspond to the benchmarks on the aspire reading and math tests information about the consistency rate of classification based on the estimated map cut scores is also provided along with a series of tables that estimate the probability of receiving a level 3 i e ready or higher performance designation on the aspire assessments based on the observed map scores taken during the same school year a detailed description of the data and analysis method used this study is provided in the appendix

## **Go Blended!**

2015-02-02

is homework an essential component of rigorous schooling or a harmful practice that alienates and discourages a significant number of students the debate over homework has gone on for decades but schools and families have changed in many ways and as author cathy vatterott notes there s a growing suspicion that something is wrong with homework rethinking homework best practices that support diverse needs examines the role homework has played in the culture of schooling over the years how such factors as family life the media and the balance movement have affected the homework controversy and what research and educators common sense tells us about the effects of homework on student learning the best way to address the pro and anti homework controversy is not to eliminate homework instead the author urges educators to replace the old paradigm characterized by longstanding cultural beliefs moralistic views the puritan work ethic and behaviorist philosophy with a new paradigm based on the following elements designing quality homework tasks differentiating homework tasks deemphasizing grading of homework improving homework completion and implementing homework strategies and support programs numerous examples from teachers and schools that have revised their practices and policies for homework illustrate the new paradigm in action the end product is homework that works for all students at all levels

## **Rethinking Homework**

2009

The mission of higher education in the 21st century must address the reconciliation of student learning and experiences through the lens of indigenous education and frameworks. Higher learning institutions throughout the oceanic countries have established frameworks for addressing indigeneity through the infusion of an indigenous perspectives curriculum. The incorporation of island indigenous frameworks into their respective curriculums, colleges and universities in the oceanic countries has seen positive impact results on student learning leading to the creation of authentic experiences in higher education landscapes. Learning and reconciliation through indigenous education in Oceania discusses ways of promoting active student learning and unique experiences through indigenous scholarship and studies among contemporary college students. It seeks to provide an understanding of the essential link between practices for incorporating island indigenous curriculum strategies for effective student learning and course designs which are aligned with frameworks that address indigeneity and that place college teachers in the role of leaders for lifelong learning through indigenous scholarship and studies in Oceania. It is ideal for professors, practitioners, researchers, scholars, academicians, students, administrators, curriculum developers and classroom designers.
