**Awesome Sauce** 2017-09-12 in *Righting America at the Creation Museum* Susan L Trolinger and William Vance Trolinger Jr take readers on a fascinating tour of the museum the Trolingers vividly describe and analyze its vast array of exhibits placards dioramas and videos from the Culture in Crisis Room where videos depict sinful characters watching pornography or considering abortion to the National Selection Room where placards argue that natural selection doesn't lead to evolution the book also traces the rise of creationism and the history of fundamentalism in America

**Bowker's Complete Video Directory** 2013-03-08 in this compelling and thoroughly researched book Benjamin Huskinson demonstrates that just as there is broad diversity within evangelicalism so too there is broad diversity among creationists his work on the intelligent design movement is superb and he prompts me to rethink my long held conviction that intelligent design is merely the most recent evolutionary form of creationism this is a very fine book Randall Balmer author of *Evangelicalism in America* and writer host of *In the Beginning: The Creationist Controversy* Benjamin Huskinson's study of American creationism will be an eye opener for those who sit on the opposite side of the evolution debate he shows that far from being a unified assault on Darwinism the campaign was actually a sequence of separate movements launched by rival evangelical groups competing for influence within their own community Peter Bowler author of *Monkey Trials and Gorilla Sermons: Evolution and Christianity from Darwin to Intelligent Design* a thoughtful and careful analysis that throws as much light on the diversity of American evangelicalism as it does on Christian attitudes to evolutionary theory Huskinson offers a smart analysis of religious anti-evolution movements which neither demonises nor ridicules but seeks to understand the tenets and beliefs of a movement far more complex and multivalent than most of us appreciate a must read for science communicators Philippa Levine Walter Prescott Webb Chair in History and Ideas University of Texas at Austin USA this book explores the cultural history of anti-evolution efforts in the United States from 1960 to the present refuting several popular narratives about creation science in evangelical America separating theological terms like creationism from cultural movements such as creation science and intelligent design in an evangelical marketplace of ideas it contests assumptions that evangelical movements against evolution are homogeneous and it argues that intelligent design is not an offshoot of the creation science movement it demonstrates that the rationale of creationist groups is relational as well as ideological showing that the social function of American creationism which is to establish the boundaries of orthodox religion is key to understanding the competing strategies of creation science organisations
