why ladies make the same mistakes their mothers made is a thought provoking piece of work that sheds light on the purpose and place of marriage couples or singles in a relationship the bible say do not be deceived evil companions corrupt good manners again the bible say train up a child the way he should go so that when he grows up he would not depart from it the truth remains that many parents have taught their sons and daughters many things either intentionally or unintentionally that they carry into their relationships unfortunately children learn by what they see and not what you say to them so the wrong actions and inaction of parents have been carried over by many children into their relationships we need to address this now so that the next generation does not perpetuate the cycle of frustrations and failure of marriages

addresses unconscious repetition a concept that is crucial to an understanding of freudian and lacanian psychoanalysis in psychoanalysis and repetition juan david nasio one of the leading contemporary lacanian psychoanalysts in france argues that unconscious repetition represents the core of psychoanalysis as well as no less than the fundamental constitution of the human being through repetition the unconscious memory of the past erupts without our knowledge in our choices and actions to such an extent that for nasio we are our past in action while nasio explains that repetition is both healthy and pathological the book is primarily concerned with the repetition of unconscious trauma as trauma engenders trauma through unconscious fantasies that are expressed in turn as symptoms through vivid clinical examples as well as trenchant theoretical explications involving repetition nasio illuminates a range of fundamental concepts in freud and lacan and offers a rethinking of the psychoanalytic tradition in the context of this theme nasio's approach is richly interdisciplinary incorporating passages from philosophers descartes and spinoza for example and from such literary figures as pindar proust and verlaine the interdisciplinary fabric of nasio's discourse conveys the crucial importance of the concept of repetition in psychoanalysis and in the human condition a clear accessible and highly readable contribution to psychoanalytic literature in the freudian and lacanian traditions nasio's writing and its translation by pettigrew is extremely lucid especially by the standards of much lacanian literature this is a very worthwhile book in its own right adrian johnston author of irrepressible truth on lacan's the freudian thing
