subdued oil prices prompted a trimmed federal budget for 2016 as the uae like other countries in the region tightened its belt in response to falling hydrocarbons revenues however a sustained focus on economic diversification and targeted investment in abu dhabi s key non oil sectors in recent years means the emirate is well positioned to weather the storm looking forward plans for future development are mapped out in abu dhabi economic vision 2030 a comprehensive economic policy document that aims to reduce dependence on oil and gas thereby creating a more sustainable knowledge based economy for the emirate and its inhabitants aided by hydrocarbons reserves that are among the world s largest and substantial financial resources abu dhabi has built up a strong foundation to become a regional leader and an increasingly important global player in a wide variety of sectors including oil and gas financial services health care aviation and renewable energy

this issue discusses economic developments in the middle east north africa afghanistan and pakistan menap which continue to reflect the diversity of conditions prevailing across the region most high income oil exporters primarily in the gcc continue to record steady growth and solid economic and financial fundamentals albeit with medium term challenges that need to be addressed in contrast other countries iraq libya and syria are mired in conflicts with not only humanitarian but also economic consequences and yet other countries mostly oil importers are making continued but uneven progress in advancing their economic agendas often in tandem with political transitions and amidst difficult social conditions in most of these countries without extensive economic and structural reforms economic prospects for the medium term remain insufficient to reduce high unemployment and improve living standards
