*Construction and Operation of a Mixed Oxide Fuel Fabrication Facility at the Savannah River Site* 2005 evaluates the potential environmental impacts of a proposed mixed oxide fuel mox fabrication facility that would convert depleted uranium and weapons grade plutonium into mox fuel

**Environmental Impact Statement of the Construction and Operation of a Proposed Mixed Oxide Fuel Fabrication Facility at the Savannah River Site, South Carolina**

2005-02-24 hazardous materials are an inevitable part of every fire fighter s job knowing how to operate safely and take the necessary precautions is crucial the fire fighter s handbook of

hazardous materials seventh edition is a quick and simple reference book of hazardous substances that fire fighters are likely to encounter

Construction and Operation of a Depleted Uranium Hexafluoride

Conversion Facility at the Paducah, Kentucky, Site 2004 leslie j

jardine lmvrence livermore national laboratoly livermore ca 94551 u s a the advanced research workshop arw on nuclear materials safety held lune 8 10 1998 in st petersburg russia was attended by 27 russian experts from 14 different russian organizations seven european experts from six different organizations and 14 v s experts from seven different organizations the arw was conducted at the state education center sec a former minatom nuclear training center in st petersburg thirty three technical presentations were made using simultaneous translations these presentations are reprinted in this volume as a formal arw proceedings in the nato science series the representative technical papers contained here cover nuclear material safety topics on the storage and disposition of excess plutonium and high enriched uranium heu fissile materials including vitrification mixed oxide mox fuel fabrication plutonium ceramics reprocessing geologic disposal transportation and russian regulatory processes this ar w completed discussions by experts of the nuclear materials safety topics that were not covered in the previous companion arw on nuclear materials safety held in amarillo texas in march 1997 these two workshops when viewed together as a set have addressed most nuclear material aspects of the storage and disposition operations required for excess hev and plutonium see fig 1 opening remarks
