## **Mastering Short Answer Questions 2009**

why did i choose to name this collection western questions eastern answers philosophy and science in the west have largely been practiced with the aim to understand the present world a number of theories have been propounded none of which are free of problems philosophy and science in the east specifically the vedic tradition has always been practiced with the aim to transcend the world vedic texts provide many theories but always in answer to a transcendental question on one hand therefore we have questions that haven t found good answers on the other there are very good answers that haven t been connected to the burning questions of mankind today combining them makes a lot of sense from both sides although i believe this type of approach to a synthesis of religion and science hasn t been attempted before clearly to repeat the same answer but in response to a different question and the answer to still make a lot of sense we must understand not just the questions and answers but also the other answers that were earlier given for the same question and how the new answer is better that is not just a demand on the author it is an equally difficult demand on the reader as well but that s the price to be paid if there is indeed a long history of incorrect answers which have to be rejected before a correct answer would be accepted after all we might still

do the right thing if only as the option of last resort my aim is to provide the answers that were previously given in response to radically different questions but now in response to the questions that currently remain unanswered many people have tried to marry the intellectual and ideological views of east and west sometimes with hilarious and disastrous results this attempt is therefore not without considerable risks although the effort is worth the trouble
