in her groundbreaking history of 175 years of american education dana goldstein finds answers in the past to the controversies that plague our public schools today teaching is a wildly contentious profession in america one attacked and admired in equal measure in the teacher wars a rich lively and unprecedented history of public school teaching dana goldstein reveals that teachers have been similarly embattled for nearly two centuries from the genteel founding of the common schools movement in the nineteenth century to the violent inner city teacher strikes of the 1960s and 70s from the dispatching of northeastern women to frontier

schoolhouses to the founding of Teach for America on the Princeton University campus in 1989 Goldstein shows that the same issues have continued to bedevil us: who should teach, what should be taught, who should be held accountable for how our children learn. She uncovers the surprising roots of hot-button issues from teacher tenure to charter schools and finds that recent popular ideas to improve schools—instituting merit pay, evaluating teachers by student test scores, ranking and firing veteran teachers, and recruiting elite graduates to teach—are all approaches that have been tried in the past without producing widespread change. And she also discovers an emerging effort that stands a real chance of transforming our schools for the better: drawing on the best practices of the three million public school teachers we already have in order to improve learning throughout our nation's classrooms. The Teacher Wars opens the conversation about American education by bringing the lessons of history to bear on the dilemmas we confront today by asking, how did we get here? Dana Goldstein brilliantly illuminates the path forward.

a national system of education cannot function without policy but the path to practice is seldom smooth especially when ideology overrules evidence or when ministers seek to micromanage what is best left to teachers and once the media join the fray the mixture becomes downright combustible drawing on his long experience as teacher researcher government adviser campaigner and international consultant and on over 600 published sources robin alexander expertly illustrates and illuminates these processes this selection from his recent writing some hitherto unpublished opens windows onto cases and issues that concern every teacher part 1 tackles system level reform it revisits the cambridge primary review an evidence rich enquiry into the condition and future of primary education in england which challenged the uk government s policies on curriculum testing standards and more besides here the reform narratives and strategies of successive governments are confronted and dissected part 2 follows the development of england s current national curriculum exposing its narrow vision

and questionable use of evidence and offering a more generous aims driven alternative this section also investigates the expertise and leadership needed if children are to experience a curriculum of the highest quality in all its aspects part 3 reaches the heart of the matter securing the place in effective pedagogy of well founded classroom talk a mission repeatedly frustrated by political intervention the centrepiece is dialogic teaching a proven tool for advancing students speaking thinking learning and arguing and an essential response to the corrosion of democracy and the nihilism of post truth part 4 goes global it investigates governments pisa fuelled flirtations with what they think can be adapted or copied from education elsewhere examines the benefits and pitfalls of international comparison and ends with the ultimate policy initiative the united nations mission to ensure inclusive and equitable quality education for all the world s children education in spite of policy is for all those teachers students school leaders and researchers who value the conversation of policy evidence and practice and who wish to explore the parts of education that policy cannot reach
