## **My Revision Notes: AQA GCSE Religious Studies: Religion and Life Issues and Religion and Morality 1905\***

one of britain s most respected television journalists with a reputation built up over many years of covering world events guardian tributes will rightly be paid to a fantastic journalist and brilliant broadcaster but george was the most decent principled kindest most honourable man i have ever worked with jon soper as a five year old george alagiah emigrated with his family to ghana the first african country to attain independence from the british empire a passage to africa is alagiah s shattering catalogue of atrocities crafted into a portrait of africa that is infused with hope insight and outrage in vivid and evocative prose and with a fine eye for detail alagiah s viewpoint is spiked with the freshness of the young george on his arrival in ghana the wonder with which he recounts his first impressions of africa and the affection with which he dresses his stories of his early family life a sense of possibility lingers even though the book is full of uncomfortable truths it is a book neatly balanced on his integrity and sense of obligation in his role as a writer and reporter the shock of recognition is always there but it is the personal element that gives a passage to africa its originality africa becomes not only a group of nations or a vast continent but an epic of individual pride and suffering

## **Values of Old Paper 2018-09-28**

easing the transition from gcse to as level this textbook meets the 2004 edexcel specifications and provides numerous worked examples and solutions to aid understanding of key concepts

## **A/AS Level Computer Science for WJEC/Eduqas Student Book 1955**

this book provides the first comprehensive account of temporal deixis in english printed and online news texts linking the characteristic usage of tenses with the projection of deictic centres it notes how conventional tenses particularly in headlines are affected by heteroglossia arising from various accessed voices the resulting tense shifts are interpreted pragmatically as a conventional reader oriented strategy that creates the impression of temporal co presence it is argued that since different tense choices systematically correlate with the three main textual segments of news texts the function of tense needs to be viewed in a close connection with its local context traditional news texts are also contrasted with online news particularly as far as the effect of hypertextuality on the coding of time is concerned a two level structural framework for the analysis of online news is proposed in order to account for their increased textual complexity the book will be of interest to a wide range of scholars and students working in the fields of media pragmatics discourse analysis and stylistics
