Public Key Infrastructures, Services and Applications

2011-09-15

this book constitutes the thoroughly refereed post conference proceedings of the 7th european workshop on public key infrastructures services and applications europki 2010 held in athens greece in september 2010 the 14 revised full papers presented together with an invited article were carefully reviewed and selected from 41 submissions the papers are organized in topical sections on authentication mechanisms privacy preserving techniques pki pkc applications electronic signature schemes identity management

Infrastructure Services

2003*

the book synthesizes findings and discussions from the symposium on monitoring sustainable wash services in addis ababa ethiopia in april 2013 it presents a state of the art of strengthening monitoring water supply and sanitation in developing countries

The Measurement of the Economic Benefits of Infrastructure Services

1986-10-01

briceno estache and shafik review the evidence on the state of infrastructure in the developing world emphasizing the investment needs and the emerging policy issues while their assessment is seriously constrained by data gaps they provide useful insights on the main challenges ahead emphasizing that in addition to the widely discussed access problems the poorest also face major affordability and service quality issues which were not well addressed by the reforms of the 1990s the authors make a case for a stronger commitment of the international community to generate the information needed to assess and monitor infrastructure needs and policies this

understand create deploy and maintain a public cloud using microsoft azure mastering microsoft azure infrastructure services guides you through the process of creating and managing a public cloud and virtual network using microsoft azure with step by step instruction and clear explanation this book equips you with the skills required to provide services both on premises and off premises through full virtualization providing a deeper understanding of azure s capabilities as an infrastructure service each chapter includes online videos that visualize and enhance the concepts presented in the book and access to a windows app that provides instant azure updates and demonstrates the process of going from on premises to public cloud via azure coverage includes storage customization connectivity virtual networks backing up hybrid environments system center management and more giving you everything you need to understand evaluate deploy and maintain environments that utilize microsoft azure understand cost options and applications of infrastructure as a service iaas enable on and off premises connectivity to azure customize azure templates and management processes exploit key technologies and embrace the hybrid environment mastering microsoft azure infrastructure services is your total solution

Infrastructure Services in Developing Countries

2004

editor s description during the past two decades latin american countries have made pioneering efforts in reforming infrastructure services the first generation of reforms encompassed widespread privatization deregulation and restructuring of the provision of energy water transport and telecommunications services second generation reforms in infrastructure services evaluates the current challenges leading to the consolidation of the initial reforms this volume deals with post privatization dispute settlement mechanisms access arrangements in network

industries and inroads to effective competition in the reformed industries the authors evaluate a set of contractual adjustments resulting from renegotiations and disputes that have taken place since the beginning of the reform process in an effort to promote competition in the provision of public services the authors suggest some practical rules for pricing access in network industries the book presents a dynamic global vision of second generation reforms underway in energy markets around the world see more at publications iadb org handle 11319 310 sthash m23wtikv dpuf

Mastering Microsoft Azure Infrastructure Services

2015-04-20

the sustainability of the livelihoods of the poor in low and middle income countries is compromised by corruption in the delivery of infrastructure services such services include water supply sanitation drainage the provision of access roads and paving transport solid waste management street lighting and community buildings for this reason the water engineering development centre wedc at loughborough university in the uk is conducting research into anti corruption initiatives in this area of infrastructure services delivery

Second-generation Reforms in Infrastructure Services

2002

cloud infrastructure and services educates readers about cloud deployment and service models cloud infrastructure and the key considerations in migrating to cloud computing using the u s national institute of standards and technology as a definitive guide the book covers technologies required to build classic traditional virtualized and cloud data center environments these technologies include compute storage networking desktop and application virtualization additional areas of focus include business continuity security and management readers will learn about the key considerations and steps involved in transitioning from the current state of their data center to a cloud computing environment upon completing this book readers will have the knowledge to make informed decisions about migrating to cloud infrastructure and choosing the best deployment model for their organization the book will cover cloud overview foundations benefits

The Urban Poor and Basic Infrastructure Services in Asia and the Pacific: Country papers

1991

the book analyses the relationship between ecosystem services green and blue infrastructures gbi and spatial planning in italy it provides insights on the opportunities and challenges in the adoption of an ecosystem services es based approach for spatial planning exploring methods and techniques for the design of gbi strategies nowadays there is an advance in es knowledge and a recognition of the benefits of gbi for the quality of human life and biodiversity conservation the main challenge remains how this knowledge could be integrated into the planning process and how it could guide the decision making process towards sustainable development for contemporary cities the book collects innovative italian experiences providing important considerations for operationalizing the es concept and highlighting different disciplinary attitudes and methodological approaches with the common goal to enhance human well being

Cloud Infrastructure Services A Complete Guide - 2019 Edition

2019-07-10

throughout the world there is a growing demand for high quality public services to support socio economic development infrastructure is central to improving the level of public services and the quality of the built environment but in key areas such as transport energy water healthcare education and communications public resources are not sufficient to keep pace with this demand as the public sector struggles to keep up the private sector is increasingly involved in the procurement of economic and social infrastructure until now procurement strategies have often concentrated on the mechanisms and the bricks and mortar without a thorough analysis of the processes and their implications for services the result is that all too often infrastructure projects are implemented in an ad hoc and fragmented way in this ground breaking book rodney howes and herbert robinson provide a holistic approach to infrastructure provision that facilitates infrastructure delivery aimed at continuously improving the level and quality of services critical issues of policy and strategy implementation and operational aspects are examined within the context of sustainability by emphasising the importance of procuring infrastructure within an overall national or regional development policy and strategy the authors have demonstrated the importance of linking investment and resource decisions to local social economic and environmental needs with each chapter carefully written to reflect part of the infrastructure delivery chain and illustrated with practical examples and case studies from around the world this book offers a new blueprint for infrastructure investment and resource management

Shelter, Infrastructure and Services in the Third World

1987

january 1998 for citizens to reap the full benefits of private investment in infrastructure infrastructure prices must be high enough to cover costs and private investors must assume commercial risk good macroeconomic policy matters because it affects the credibility of a price regime and especially the trust in currency convertibility essential for foreign investors driven by fiscal austerity and disenchantment with the performance of state provided infrastructure services many governments have turned to the private sector to build operate finance or own infrastructure in power gas water transport and telecommunications sectors private capital flows to developing countries are increasing rapidly 15 percent of infrastructure investment is now funded by private capital in emerging markets but relative to needs such private investment is progressing slowly governments are reluctant to raise consumer prices to cost covering levels while investors mindful of experience fear that governments may renege on promises to maintain adequate prices over the long haul so investors ask for government support in the form of grants preferential tax treatment debt or equity contributions or guarantees these subsidies differ in how they allocate risk between private investors and government efficiency gains are greatest when private parties assume the risks that they can manage better than the public sector when governments establish good policies especially cost covering prices and credible commitments to stick to them investors are willing to invest without special government support privatizing

assets without government guarantees or other financial support is possible even where governments are politically unable to raise prices because investors can achieve the returns they demand by discounting the value of the assets they are purchasing but this is not possible for new investments greenfield projects if prices have been set too low and the government is not willing to raise them it must give the investor financial support such as guarantees and other forms of subsidy to facilitate worthwhile projects that would not otherwise proceed but guarantees shift costs from consumers to taxpayers who subsidize users of infrastructure services much of that subsidy is hidden since the government does not record the guarantee in its fiscal accounts and taxpayers provide unremunerated credit insurance as the government borrows based on its ability to tax citizens if the project fails not on the strength of the project itself this paper a joint product of the regulatory reform and private enterprise division economic development institute and the private participation in infrastructure group was presented at the conference managing government exposure to private infrastructure projects averting a new style debt crisis held in cartagena colombia may 29/30 1997 mansoor dailami may be contacted at mdailami@worldbank.org
