resulted in an infinite postponement of authentic cultural identity and a perpetuation aided by intellectuals of a social order in which popular demands were either ignored or repressed in the context of this debate this book explores the roles played by intellectuals in the creation of popular national identities in twentieth century spanish america and seeks to identify the factors which lie behind two such contrasting evaluations of their contribution ranging across the intellectual centers of argentina chile cuba mexico and peru it illustrates vividly the diversity and evolution of intellectual life in the region particular attention is paid to the idea of peripheral modernity and its influence on intellectual activity as well as to the contributions made by intellectuals to the three major strands in debates on popular national identity bi culturalism anti imperialism and history
