R Markdown

2018-07-27

r markdown the definitive guide is the first official book authored by the core r markdown developers that provides a comprehensive and accurate reference to the r markdown ecosystem with r markdown you can easily create reproducible data analysis reports presentations dashboards interactive applications books dissertations websites and journal articles while enjoying the simplicity of markdown and the great power of r and other languages in this book you will learn basics syntax of markdown and r code chunks how to generate figures and tables and how to use other computing languages built in output formats of r markdown pdf html word rtf markdown documents and ioslides slidy beamer powerpoint presentations

extensions and applications dashboards tuftes handouts xaringan reveal.js presentations websites books journal articles and interactive tutorials advanced topics parameterized reports html widgets document templates custom output formats and shiny documents yihui xie is a software engineer at rstudio he has authored and co-authored several R packages including knitr rmarkdown bookdown blogdown shiny xaringan and animation he has published three other books dynamic documents with R and knitr bookdown authoring books and technical documents with R markdown and blogdown creating websites with R markdown j j allaire is the founder of rstudio and the creator of the rstudio IDE he is an author of several packages in the R markdown ecosystem including rmarkdown flexdashboard learnr and radix garrett grolemund is the co-author of R for data science and author of hands on programming with R he wrote the lubridate R package and works for rstudio as an advocate who trains engineers to do data science with R and the tidyverse

Computer Science and Convergence

2011-12-10

Computer Science and Convergence is proceedings of the 3rd FTRA International Conference on Computer Science and its Applications CSA 11 and the 2011 FTRA World Convergence Conference FTRA WCC 2011. The topics of CSA and WCC cover the current hot topics satisfying the world wide ever changing needs. CSA 11 will be the most comprehensive conference focused on the various aspects of advances in computer science and its applications and will provide an opportunity for academic and industry professionals to discuss the latest issues and progress in the area of CSA. In addition the conference will publish high quality papers which are closely related to the various theories and practical applications in CSA. Furthermore we expect that the conference and its publications will be a trigger for further related research and technology improvements in this important subject. The main scope of CSA 11 is as follows: mobile and ubiquitous computing, dependable, reliable and autonomic computing, security and trust management, multimedia systems and services, networking and communications, database and data mining, game and software engineering, grid, cloud and scalable computing, embedded system and software, artificial intelligence, distributed and parallel algorithms and internet computing, IT policy and business management. WCC 11 is a major conference for scientists, engineers and practitioners throughout the world to present the latest research results, ideas, developments and applications in all areas of convergence technologies. The main scope of WCC 11 is as follows:

cryptography and security for converged environments wireless sensor network for converged environments multimedia for converged environments advanced vehicular communications technology for converged environments human centric computing p2p grid and cloud computing for converged environments u healthcare for converged environments strategic security management for industrial technology advances in artificial intelligence and surveillance systems

Advances in Information Retrieval

2011-04-12

this book constitutes the refereed proceedings of the 33rd annual european conference on information retrieval research ecir 2011 held in dublin ireland in april 2010 the 45 revised full papers presented together with 24 poster papers 17 short papers and 6 tool demonstrations were carefully reviewed and selected from 223 full research paper submissions and 64 poster demo submissions the papers are organized in topical sections on text categorization recommender systems ir ir evaluation ir for social networks cross language ir ir theory multimedia ir ir applications interactive ir and question answering nlp

Practical SGML

2012-12-06

since the initial publication of practical sgml the computer industry has seen a dramatic increase in the use and acceptance of sgml and many of the concepts derived from it the existence of practical sgml has helped to foster this growth as it provides a practical and vital introduction to the many facets of sgml and how its fits into an organization whether it be business or government practical sgml second edition is an extensive revision and update that puts greater emphasis and focus on helping the novice work his or her way through the vast amounts of information required to become proficient in sgml practical sgml second edition provides the reader with an understanding of the tools currently on the market that enable the easy creation of sgml data and the use and distribution of that data in a variety of forms the minimum amount of

information needed by people who wish to understand and use iso 8879 aids and information on how to stay current with the volumes of material written on sgml in publications throughout the world practical examples of the many sgml constructs and guidelines on their appropriate uses other helpful hints and insights based on years of working with the standard and integrating it into a complex and challenging computer environment exercises throughout the text allow the readers to test their understanding answers are given in appendix a practical sgml second edition is an invaluable reference manual for anyone interested in understanding and using sgml

The Lawyer's Guide to Microsoft Word 2007

2009

microsoft word is one of the most used applications in the microsoft office suite this handy reference includes clear explanations legal specific descriptions and time saving tips for getting the most out of microsoft word and customizing it for the needs of today s legal professional focusing on the tools and features that are essential for lawyers in their practice this book explains the key components to help make lawyers more effective more efficient and more successful

Database and XML Technologies

2009-08-06

this book constitutes the refereed proceedings of the 6th international xml database symposium xsym 2009 held in lyon france in august 2009 in conjunction with the international conference on very large data bases vldb 2009 the 8 revised full papers together with 7 short paper were carefully reviewed and selected from 26 submissions covering all current aspects of core database technology for xml data management xml and data integration and development and deployment of xml applications the papers are organized in topical sections on xml twig queries query execution xml document parsing and compression xquery and xml transaction management and schema design

Multimedia and Web Technology

2001-08-15

a textbook on computer science

Pure JavaScript

2008-11-14

pure javascript second edition is a substantial and focused reference for experienced developers this book begins with an accelerated introduction to the newest features of javascript so that experienced developers can quickly understand the concepts of javascript and begin developing their own javascript solutions immediately pure javascript second edition contains concise descriptions of javascript forms cookies windows and layers beyond the brief descriptions and short syntax snippets found in most references this book also provides real life well commented javascript examples for each documented object property method and event handler this not only helps the reader s understanding of the syntax but also provides a contextual aid in determining how and why a specific object or method may be used it also includes a special reference section dedicated to server side javascript coverage of jsript and active scripting and a complete reference to browser supported javascript

Digital Libraries: Universal and Ubiquitous Access to Information

2013-12-23

this book constitutes the refereed proceedings of the 11th international c ference on asian digital libraries icadl 2008 held in bali indonesia in december 2008 the objective of this conference series is to provide a forum for presentation of high quality research in the eld of digital libraries icadl 2008 provided an oppportunity for digital libraries researchers and practitioners in

the asia paci c area and beyond to gather to explore ideas exchange and share experiences and further build the research network in this region icadl 2008 was a truly international event with presenters from 21 countries a total of 63 papers were accepted for inclusion in the proceedings 30 full papers 20 short papers and extended abstracts of 13 posters submissions were subject to a rigorous blind peer review process the research topics cover the spectrum of digital libraries including multimedia digital libraries usability and evaluation information retrieval ontologies social tagging metadata issues multi and cross language retrieval digital preservation scholarly publishing and communities and more additionally three tutorials were offered in association with the conference by andreas rauber vienna university of technology david bainbridge university of waikato and george buchanan swansea university

Teach Yourself VISUALLY Complete OS X Mavericks

2019-12-14

a deep dive into os x mavericks if you want to quickly cover the basics of apple s new operating system os x mavericks and then delve deeper into the topic this is the book for you using clear step by step screenshots teach yourself visually complete os x mavericks shows you how to tackle not only beginning but also intermediate and more advanced functions two page side by side lessons break big topics into smaller bits and you ll find helpful sidebars with plenty of practical tips and tricks if you re a visual learner looking for enhanced coverage of os x mavericks this new guide has more of what you re looking for explains how to use and optimize the newest os x operating system mavericks covers the basics then delves deeper into more advanced techniques and tasks uses succinct explanations and high resolution screenshots perfect for visual learners who prefer instructions that show rather than tell how to do things when it comes to os x mavericks find more of what you re looking for in teach yourself visually complete os x mavericks

Data-Centric Business and Applications

1997

this book explores various aspects of software creation and development as well as data and information processing it covers relevant topics such as business analysis business rules requirements engineering software development processes software defect prediction information management systems and knowledge management solutions lastly the book presents lessons learned in information and data management processes and procedures

Readings in Information Retrieval

2008-05-05

this compilation of original papers on information retrieval presents an overview covering both general theory and specific methods of the development and current status of information retrieval systems each chapter contains several papers carefully chosen to represent substantive research work that has been carried out in that area each is preceded by an introductory overview and followed by supported references for further reading

Web Standards Programmer's Reference

2018-05-09

this invaluable resource offers tutorials and real world examples as well as thorough language references for markup languages html xhtml and css and popular scripting languages javascript perl and php examines the role of javascript cgi with examples in perl and python and php on the and shows how to best use them all includes a valuable reference section on each technology that can be used for review and consultation

New Opportunities for Software Reuse

2015

this book constitutes the refereed proceedings of the 17th international conference on software reuse icsr 2018 held in madrid spain in may 2018 the 9 revised full papers and 2 short papers presented were carefully reviewed and selected from 29 submissions the papers are organized in the following topical sections variability management hierarchies and reuse measures dependencies and traceability and software product lines features and reuse of code rewriters

An Online Analytical System for Multi-tagged Document Collections

2018-11-19

the new york times annotated corpus and the acm digital library are two prototypical examples of document collections in which each document is tagged with keywords and significant phrases such collections can be viewed as high dimensional document cubes against which browsers and search systems can be applied in a manner similar to online analytical processing against data cubes the tagging patterns in these collections are examined and a generative tagging model is developed that can mimic the tag assignments observed in those collections when a user browses the collection by means of a boolean query over tags the result is a subset of documents that can be summarized by a centroid derived from their document term vectors a partial materialization strategy is developed to provide efficient storage and access to centroids for such document subsets a customized local term vocabulary storage approach is incorporated into the partial materialization to ensure that rich and relevant term vocabulary is available for representing centroids while maintaining a low storage footprint by adopting this strategy summary measures dependent on centroids including bursty terms or larger sets of indicative documents can be efficiently and accurately computed for important subsets of documents the proposed design is evaluated on the two collections along with pubmed a held back document collection and several synthetic collections to validate that it outperforms alternative storage strategies finally an enhanced faceted browsing system is developed to support users exploration of large multi tagged document collections it provides summary measures of document result sets at each step of navigation through a set of indicative terms and diverse set of documents as well as information scent that helps to guide users exploration these summaries are derived from pre materialized views that allow for quick calculation of centroids for various result sets the utility and efficiency of the system is demonstrated on the new york times annotated corpus

Olympiad Champs Cyber Class 8 with Past Olympiad Questions

2000

olympiad champs cyber class 8 with past olympiad questions is a complete preparatory book for olympiad exams for class 8 the book provides complete theory with illustrations real life images along with fully solved exercises in 2 levels level 1 is the beginner s level which comprises of mcqs like fillers analogy and odd one out level 2 advanced level comprises of questions based on techniques like matching chronological sequencing picture feature based statement correct incorrect integer based puzzle grid based and much more the exercises have been empowered with past questions from various olympiad exams like nco gtse etc

Using Java Server Pages and Servlets

2013-11-27

special edition using jsp and servlets starts by detailing the evolution of web servers that led to the creation of asp and jsp it explains both the limitations of previous technologies and the benefits that jsp provides including platform independence includes coverage of organizing applications with multiple files and client side objects generating well formed xml using jsp storing data in cookies and sessions interacting with enterprise java beans displaying dynamic graphics with java 2d and using rmi and corba to enhance jsp applications the final chapters demonstrate advanced jsp servlet techniques including using jsp to create wireless xml based applications appendices provide an overview of popular jsp servlet runtime environments including jrun tomcat and servletexec

Service-Oriented Computing

2011-07-12

this book constitutes the refereed proceedings of the 11th international conference on service oriented computing icsoc 2012 held in berlin germany in december 2013 the 29 full papers and 27 short papers presented were carefully reviewed and selected from 205 submissions the papers are organized in topical sections on service engineering service operations and management services in the cloud and service applications and implementations

Music Data Mining

2020-06-17

the research area of music information retrieval has gradually evolved to address the challenges of effectively accessing and interacting large collections of music and associated data such as styles artists lyrics and reviews bringing together an interdisciplinary array of top researchers music data mining presents a variety of approaches to successfully employ data mining techniques for the purpose of music processing the book first covers music data mining tasks and algorithms and audio feature extraction providing a framework for subsequent chapters with a focus on data classification it then describes a computational approach inspired by human auditory perception and examines instrument recognition the effects of music on moods and emotions and the connections between power laws and music aesthetics given the importance of social aspects in understanding music the text addresses the use of the and peer to peer networks for both music data mining and evaluating music mining tasks and algorithms it also discusses indexing with tags and explains how data can be collected using online human computation games the final chapters offer a balanced exploration of hit song science as well as a look at symbolic musicology and data mining the multifaceted nature of music information often requires algorithms and systems using sophisticated signal processing and machine learning techniques to better extract useful information an excellent introduction to the field this volume presents state of the art techniques in music data mining and information retrieval to create novel ways of interacting with large music collections

Cyberspace

2015-03-11

parallel to the physical space in our world there exists cyberspace in the physical space there are human and nature interactions that produce products and services on the other hand in cyberspace there are interactions between humans and computer that also produce products and services yet the products and services in cyberspace don t materialize they are electronic they are millions of bits and bytes that are being transferred over cyberspace infrastructure

IAENG Transactions on Engineering Sciences

2012-12-09

two large international conferences on advances in engineering sciences were held in hong kong march 12 14 2014 under the international multiconference of engineers and computer scientists imecs 2014 and in london uk 2 4 july 2014 under the world congress on engineering 2014 wce 2014 respectively this volume contains 37 revised and extended research articles written by prominent researchers participating in the conferences topics covered include engineering mathematics computer science electrical engineering manufacturing engineering industrial engineering and industrial applications the book offers tremendous state of the art advances in engineering sciences and also serves as an excellent reference work for researchers and graduate students working with on engineering sciences contents switching boundaries for flexible management of natural resource investment under uncertainty t tarnopolskaya w chen and c bao using exotic option prices as control variates in monte carlo pricing under a local stochastic volatility model geoffrey lee zili zhu and yu tian multi period dynamic portfolio optimization through least squares learning c bao z zhu n langrené and g lee on general solution of incompressible and isotropic newtonian fluid equations a a maknickas on the inversion of vandermonde matrix via partial fraction decomposition yiu kwong man fractal fourier coefficients with application to identification protocols nadia m g al saidi arkan j mohammed elisha a ogada and adil m ahmed scheduling algorithm with inserted idle time for problem p prec cmax n s grigoreva iterative scheme for a common solutions of equilibrium problems variational inequality problems and fixed point
