Publishing in High Impact Factor Journals

2022-10-21

this book proposes a reference framework and guidelines to help researchers produce a manuscript of high scientific quality in order to meet the requirements of high impact journals and to succeed in their publication endeavours it offers a series of precise guidelines tips and tricks with a detailed description of the different steps to be taken to achieve a solid publication with a high impact factor as such the book will be of interest to students and researchers alike

Scientific Writing for Impact Factor Journals

2013

publish or perish this old adage illustrates the importance of scientific communication essential to research it also represents a strategic sector for each country s competitiveness an often neglected topic scientific communication is of vital importance with new information technologies accelerating and profoundly changing how knowledge is disseminated the necessity of optimally disseminating experts findings has also become crucial to researchers institutes and universities alike which has prompted the recent advent of impact factors for the evaluation and financing of research the goal being for scientific knowledge to be equally distributed to a very broad audience especially to the media entrepreneurs and sociopolitical players this handbook presents the golden rules for publishing scientific articles in order to do away with major recurring errors the author explains how to easily structure an article and offers support for the typical mistakes made by native french speakers publishing in english tips on how to make the style more academic of more general to fit your intended readership and in the book s closing section suggests new publishing techniques of the internet age such as the micro article which allows researchers to focus their findings into a single innovative point the major principles presented can be applied to a broad range of documents such as theses industry reports publicity texts letters of intent cvs resumes blogs and press releases as all of these documents involve presenting information on advances discoveries innovations or changes to our previous knowledge

Scientific Writing for Impact Factor Journals

2013-01-01

publish or perish this old adage illustrates the importance of scientific communication essential to research it also represents a strategic sector for each country s competitiveness an often neglected topic scientific communication is of vital importance with new information technologies accelerating and profoundly changing how knowledge is disseminated the necessity of optimally disseminating experts findings has also become crucial to researchers institutes and universities alike which has prompted the recent advent of impact factors for the evaluation and financing of research the goal being for scientific knowledge to be equally distributed to a very broad audience especially to the media entrepreneurs and sociopolitical players this

handbook presents the golden rules for publishing scientific articles in order to do away with major recurring errors the author explains how to easily structure an article and offers support for the typical mistakes made by native french speakers publishing in english tips on how to make the style more academic of more general to fit your intended readership and in the book s closing section suggests new publishing techniques of the internet age such as the micro article which allows researchers to focus their findings into a single innovative point the major principles presented can be applied to a broad range of documents such as theses industry reports publicity texts letters of intent cvs resumes blogs and press releases as all of these documents involve presenting information on advances discoveries innovations or changes to our previous knowledge

Improved, extended, and total impact factor of a journal

2020-08-01

in this short paper we recall the garfield impact factor of a journal we improve and extend it and eventually present the total impact factor that reflects the most accurate impact factor

A Note on the Impact Factor Journals of 'Statistics and Probability'

2014

this brief communications aims at sharing the list of impact factor journals of statistics probability as per the journal citation report 2011 released by institute of scientific information this would update the academia and practitioner on their information about the ranking of the journals the study makes country and regions wise comparisons of the changes in no of journals and their mean impact factors reported in the previous and current reports

The Impact Factor of Scientific and Scholarly Journals

2007

scientific communication depends primarily on publishing in journals the most important indicator to determine the influence of a journal is the impact factor since this factor only measures the average number of citations per article in a certain time window it can be argued that it does not reflect the actual value of a periodical this book defines five dimensions which build a framework for a multidimensional method of journal evaluation the author is winner of the eugene garfield doctoral dissertation scholarship 2011

Multidimensional Journal Evaluation

2012-04-26

the present study attempts to examine the numerical correlation between web ranking of electronic scientific journals and impact factor of these journals using the method of regression analysis regression analysis allows

the option of investigating and predicting the numerical relationship between website ranking of scientific journals on the world wide and the value of impact factor of the journals a sample of 57 publishers with 6 272 scientific journals and 50 standalone scientific journals was analyzed during research procedure in this study two different indicators about websites classification on world wide were examined separately for 57 publishers and 50 standalone journals alexa rank and statscrop rank the electronic databases through the internet constitute the main information resources of this study about the impact factors the general conclusion that arises is that the impact factor of electronic scientific journals illustrates a very strong positive correlation with classification of websites on the world wide furthermore it is concluded that the change of web ranking as a function of impact factor is governed by a gaussian function or rational function with lower pearson coefficient and presents non linearly correlation even if there is very strong correlation between impact factor and web rank for electronic journals the prediction of impact factor from web rank is not possible and presents many divergences

Numerical Correlation between Impact Factor and Web Ranking of Electronic Scientific Journals Using Regression Analysis

2017-12-15

what is it with people s obsession with their bodies and of others are you by any chance one of them the body factor is a journal that contains two recurrent questions on each right side page designed to keep things neat and create a habit simply write down the situations that put your obsession to the test you think you re too fat but your health exams show you that you re healthy or too skinny some parts of your body may not please the gods of beauty and consumes you write it all down with time you ll see how much energy you ve spent on something that doesn t bring you any real benefit we are minds conscioussnesses and intelligence the last thing we are is a body the body factor is part of a series of simple self help journals that won t change your life but maybe you will through the journey you create in it with lines on the right side only this 6x9 inch journal is easy on the eye and great for practical people of all ages start your journey today or gift someone you care

The Body Factor

2020-01-17

this handbook presents the state of the art of quantitative methods and models to understand and assess the science and technology system focusing on various aspects of the development and application of indicators derived from data on scholarly publications patents and electronic communications the individual chapters written by leading experts discuss theoretical and methodological issues illustrate applications highlight their policy context and relevance and point to future research directions a substantial portion of the book is dedicated to detailed descriptions and analyses of data sources presenting both traditional and advanced approaches it addresses the main bibliographic metrics and indexes such as the journal impact factor and the h index as well as altmetric and webometric indicators and science mapping techniques on different levels of aggregation and in the context of their value for the assessment of research performance as well as their impact

on research policy and society it also presents and critically discusses various national research evaluation systems complementing the sections reflecting on the science system the technology section includes multiple chapters that explain different aspects of patent statistics patent classification and database search methods to retrieve patent related information in addition it examines the relevance of trademarks and standards as additional technological indicators the springer handbook of science and technology indicators is an invaluable resource for practitioners scientists and policy makers wanting a systematic and thorough analysis of the potential and limitations of the various approaches to assess research and research performance

Springer Handbook of Science and Technology Indicators

2019-10-30

institute for scientific information isi have recently released journal citation report jcr for 2013 keeping in view our tradition qadeer and ahmad 2012 2013 of updating the academia and practitioner on their information about the impact factors of the isi journals in the subject category statistics and probability the latest list is being shared through this brief communication according to jcr 2013 there are 119 impact factor journals in this list 3 year impact factor is being reported along with the country of origin of the journal

Modified Impact Factor for Clustering of Journals

2006

as the summary of a vision the book is brilliant one can feel the enthusiasm of the authors throughout i see it as a vehicle for initiating a fruitful dialogue between chemical producers and regulatory enforcers without the confrontation which often characterizes such interactions martyn poliakoff green chemistry february its is an introductory text taking a broad view and intergrating a wide range of topics including synthetic methodologies alternative solvents and catalysts biosynthesis and alternative feedstocks there are exercises for students and the last chapter deals with future trends aslib

Impact Factor Journals in 'Statistics and Probability' Updated in 2014 by ISI.

2015

is journal impact factor a good measure of research merit this question has assumed a great importance after the notification of the university grants commission minimum qualifications for appointment of teachers and other academic staff in universities and colleges and measures for the maintenance of standards in higher education regulations 2009 on september 23rd 2009 now publication of research papers articles in reputed journals has become an important factor in assessment of the academic performance of teachers in colleges and universities in india one of the measures of reputation and academic standard rank or importance of a journal is the so called impact factor this study makes a detailed statistical analysis of journal impact factors across the disciplines it finds

that if journal impact factor is used to assess the academic performance of individuals for the purpose of selection promotion etc and it is not borne in mind that due to vast differences in the nature of distribution of impact factors across the disciplines they are not justifiably comparable a below average scholar in the one discipline will rank higher and will be honored and benefitted more than another scholar in some other discipline wherein the journal impact factor is adversely skewed it may be noted that in the university departments there are specializations with low impact factor journals and other specializations with very high impact factor journals but the teachers researchers of different specializations in the departments compete with each other for promotion in this milieu the researchers with an unfortunate specialization wherein the journal impact factor is mingy or adversely skewed would receive injustice is plainly predetermined therefore a measure such as the h index which quantifies the quality as well as productivity of an individual author scholar would be more appropriate than the journal impact factor the h index may be fine tuned and hence the g index or tol s index may be used nevertheless even the h index and the tol s index would not be appropriate to the purpose of inter disciplinary or inter specialization comparisons a more informed and balanced judgment of the expert committee for selection appointment and promotion purposes will continue to be extremely important

Analysis of the Impact Factor of Scientific Journals

2014

traducción parcial de la introducción en la actualidad la evaluación de la investigaciones es una cuestión que se está replanteando en todo el mundo en algunos casos los trabajos de investigación están generando resultados muy buenos en la mayoría de los casos los resultados son mediocres y en algunos casos negativos por todo esto la evaluación de los resultados de la investigación se convierte en una condición sine qua non cuando el número de investigadores eran menos eran los propios colegas de profesión quienes evaluaban la investigación con el paso del tiempo el número de investigadores aumentó las áreas de investigación proliferaron los resultados de la investigación se multiplicaron la tendencia continuó y después de la segunda guerra mundial la investigación comenzó a crecer exponencialmente hoy en día incluso en una estimación moderada hay alrededor de más de un millón de investigadores y producen más de dos millón de trabajos de investigación y otros documentos por año en este contexto la evaluación de la investigación es una cuestión de primera importancia para cualquier promoción acreditación premio y beca puede haber decenas o cientos de nominados de entre éstos seleccionar el mejor candidato es una cuestión difícil de determinar las evaluaciones inter pares en muchos casos están demostrando ser subjetivas en 1963 se crea science citation index sci que cubre la literatura científica desde 1961 unos años después eugene garfield fundador del sci preparó una lista de los 50 autores científicos más citados basándose en las citas que recibía el trabajo de un autor por parte de los trabajos de otros colegas de investigación el documento titulado pueden predecirse los ganadores del premio nobel fue publicado en 1968 garfield y malin 1968 en el siguiente año es decir 1969 dos científicos que figuran en la lista por ejemplo derek hr barton y murray gell mann recibieron el codiciado premio esto reivindicó la utilidad del análisis de citas cada año varios científicos pertenecientes al campo de la física química fisiología y medicina reciben el premio nobel de esta manera el análisis de citas se convirtió en una herramienta útil sin embargo el análisis de citas siempre tuvo críticas y múltiples fallas incluso garfield comentó el uso del análisis de citas de los trabajos de evaluación es una

tarea difícil existen muchas posibilidades de error garfiled 1983 para la evaluación de la investigación se necesitaban algunos otros indicadores el análisis de citas junto con la revisión por pares garantiza el mejor juicio en innumerables casos pero se necesita algo que sea más exacto la llegada de la world wide web brindó la oportunidad pues un buen número de indicadores se están generando a partir de los datos disponibles en la www trad julio alonso arévalo univ salamanca

Green Chemistry

2000-01-01

represents the culmination of an 18 month long project that aims to be the definitive review of this important topic accompanied by a scholarly literature review some new analysis and a wealth of evidence and insight the report is a tour de force a once in a generation opportunity to take stock dr steven hill head of policy hefce lse impact of social sciences blog a must read if you are interested in having a deeper understanding of research culture management issues and the range of information we have on this field it should be disseminated and discussed within institutions disciplines and other sites of research collaboration dr meera sabaratham lecturer in international relations at the school of oriental and african studies university of london lse impact of social sciences blog metrics evoke a mixed reaction from the research community a commitment to using data and evidence to inform decisions makes many of us sympathetic even enthusiastic about the prospect of granular real time analysis of our own activities yet we only have to look around us at the blunt use of metrics to be reminded of the pitfalls metrics hold real power they are constitutive of values identities and livelihoods how to exercise that power to positive ends is the focus of this book using extensive evidence gathering analysis and consultation the authors take a thorough look at potential uses and limitations of research metrics and indicators they explore the use of metrics across different disciplines assess their potential contribution to the development of research excellence and impact and consider the changing ways in which universities are using quantitative indicators in their management systems finally they consider the negative or unintended effects of metrics on various aspects of research culture including an updated introduction from james wilson the book proposes a framework for responsible metrics and makes a series of targeted recommendations to show how responsible metrics can be applied in research management by funders and in the next cycle of the research excellence framework the metric tide is certainly rising unlike king canute we have the agency and opportunity and in this book a serious body of evidence to influence how it washes through higher education and research

Does the Journal Impact Factor Help Make a Good Indicator of Academic Performance?

2010

advances in applied mechanics draws together recent significant advances in various topics in applied mechanics published since 1948 advances in applied mechanics aims to provide authoritative review articles on topics in the mechanical sciences primarily of interest to scientists and engineers working in the various

branches of mechanics but also of interest to the many who use the results of investigations in mechanics in various application areas such as aerospace chemical civil environmental mechanical and nuclear engineering covers all fields of the mechanical sciences highlights classical and modern areas of mechanics that are ready for review provides comprehensive coverage of the field in question

complexities in colorectal surgery decision making and management provides a unique modern practical guide that covers the strategic evaluation specific approaches and detailed management techniques utilized by expert colorectal surgeons caring for patients with complex problems whether they result from underlying colorectal disease or from complications arising from previous surgical therapy the text is formatted as both a how to manual as well as an algorithm based guide allowing the reader to understand the thought process behind the proposed treatment strategies by making use of evidence based recommendations each chapter will include not only diagnostic and therapeutic guidelines but also a narrative by the author on his her operative technical details and perioperative tips and tricks that they utilize in the management of these complex surgical challenges this text includes chapters on the assessment of risk and nutritional intervention methods utilized to minimize perioperative complications in addition sections on medical and surgical therapies for abdominal pelvic and anorectal disease are incorporated moreover the technical challenges of managing complications resulting from the original or subsequent operations is addressed the underlying focus throughout the text is to provide pragmatic and understandable solutions that can be readily implemented by surgeons of varying experience to successfully treat complex colorectal problems the text also goes beyond the technical aspects of colorectal surgery and includes special sections highlighting the essence of a surgeon these include chapters describing the importance of the first encounter building patient rapport and demonstrating confidence and competence while showing humility and avoiding arrogance additionally aspects involving the medical legal ethical and economic challenges confronting surgeons are covered

Journal Development

1992

the author lays out the patterns of subject specialization within chemistry and physics in non technical language emphasizing the often colourful people and events that influenced the founding of new areas of research and their journals

Representations of Science and Technology

2016-01-20

this book constitutes the refereed proceedings of the 17th conference on artificial intelligence in medicine aime

2019 held in poznan poland in june 2019 the 22 revised full and 31 short papers presented were carefully reviewed and selected from 134 submissions the papers are organized in the following topical sections deep learning simulation knowledge representation probabilistic models behavior monitoring clustering natural language processing and decision support feature selection image processing general machine learning and unsupervised learning

The Metric Tide

2013-11-13

this reference text brings together comprehensive reviews of the latest research in the field of bionanomaterials with a focus on fundamentals and biomedical applications detailed coverage of the classification properties and synthesis of bionanomaterials is provided to enhance readers understanding the book combines new ideas to uplift the advancement of bionanomaterials in biomedical research and provides a valuable reference for researchers and advanced students in the fields of biomaterials bionanotechnology and bioengineering the major applications covered include nanobiosensing nanomedicine diagnostics therapeutics tissue engineering and green bionanotechnology the properties and applications of synthetic bionanomaterials and molecularly imprinted polymer based bionanomaterials are also included

Advances in Applied Mechanics

2014-02-03

this book is an indispensable guide to how to write articles choose journals and deal with revisions or rejection each chapter is written by a highly experienced journal editor people who have actually made decisions on manuscripts and publication as well as being eminent in their respective scientific field and written many articles themselves it showcases parts of articles discusses journal submission outlines the resubmission process and highlights systemic issues clear instructions are given on writing an empirical article literature reviews titles and abstracts introductions theories hypotheses methods and data analysis each part of the process is laid out from presenting results to mapping out a discussion and writing for referees the integral skills of revising papers and ensuring a high impact are taught in article writing 101 whilst less intuitive knowledge is provided concerning publishing strategies references online submission review systems open access and ethical considerations

Complexities in Colorectal Surgery

1958

this book first published in 2002 gathers some of america s top subject expert librarians to determine the most influential journals in their respective fields 32 contributing authors reviewed journals from over twenty countries that have successfully shaped the evolution of their individual specialties worldwide their choices

reflect the history of each discipline or profession taking into account rivalries between universities professional societies for profit and not for profit publishers and even nation states and international ideologies in each journal s quest for reputational dominance each journal was judged using criteria such as longevity of publication foresight in carving out its niche ability to attract sustain professional or academic affiliations opinion leadership or agenda setting power and ongoing criticality to the study or practice of their field the book presents wholly independent reviewers none are in the employ of any publisher but each is fully credentialed and well published and many are award winners the authors guide college and professional school librarians on limited budgets via an exposition of their analytical and critical winnowing process in determining the classic resources for their faculty students and working professional clientele

contributed research papers

Journals of the Century

1808

this book is a full guidebook among more than 218 accounting international journals with an evaluation of 3 000 publications for over the last two years it aims to help readers for selecting an appropriate journal for publishing own research in the international arena or to find the required topic for conducting further investigating or to be informed about so large scale science as accounting here a reader will find detailed information about accounting journals in terms of scopus of science and scimago databases in addition there are highlighted accounting journals in terms of ifrs and blockchain concentration in accounting researches nowadays the relevant aims and scope of each journal are also presented anyway this book is an indispensable assistant for students while getting the accounting specialization as well as teachers and scientists while conducting empirical researches in the practice and theory of the accounting filed

Two Journals of Robert Campbell (Chief Factor Hudson's Bay Company), 1808 to 1853

2005-05-09

carbon dioxide utilisation closing the carbon cycle explores areas of application such as conversion to fuels mineralization conversion to polymers and artificial photosynthesis as well as assesses the potential industrial suitability of the various processes after an introduction to the thermodynamics basic reactions and physical chemistry of carbon dioxide the book proceeds to examine current commercial and industrial processes and the potential for carbon dioxide as a green and sustainable resource while carbon dioxide is generally portrayed as a bad gas a waste product and a major contributor to global warming a new branch of science is developing to convert this bad gas into useful products this book explores the science behind converting co2 into fuels for our cars and planes and for use in plastics and foams for our homes and cars pharmaceuticals building materials and many more useful products carbon dioxide utilization is a rapidly expanding area of research that holds a potential key to sustainable petrochemical free chemical production and energy integration accessible and balanced between chemistry engineering and industrial applications informed by blue sky thinking and realistic possibilities for future technology and applications encompasses supply chain sustainability and economics processes and energy integration

PULP Guide: Where to publish, Information on academic journals relevant to law and accredited by the Department of Education of South Africa (Second Edition)

2022

this research combined archives of grant awards with a five year period of bibliographic data from of science in order to conduct an input output study of research supported by the national science foundation acknowledgement lag is proposed as a new bibliometric term defined as the time elapsed between when a grant is awarded and when a document is published which acknowledges that award acknowledgement lag was computed for the dataset and domain differences in lag times were analyzed some areas such as plant animal science or social science were found to be more likely than other categories to acknowledge a grant seven or more years later while other categories such as physics were most likely to publish a grant acknowledgement in two years or less in addition rank normalized impact factors were computed for journals in which these articles were published as a measure of journal impact that is comparable across categories of research the overall distribution of rank normalized journal impact factors for research articles acknowledging support by the national science foundation was analyzed category level analysis was also performed and it was found that there were differences in the journal impact factor trends for publications from different domains in the dataset research in materials science was substantially more likely than other categories to publish in the most elite journals of its respective domain social sciences research was also found to be one of the strongest

research areas in terms of impact factor despite being one of the smaller categories in terms of publication counts however other categories were found to be disproportionately more likely to have been published in lower impact factor journals for their respective fields such as mathematics and computer science the methodology developed in this project demonstrates a workflow that could be implemented by the nsf or other agencies the findings demonstrate that systematically linking grants to publications can yield information of strategic value allowing agencies to better understand field differences in outcomes and providing a means for tracking changes in publication related metrics over time
