## **Private Landscapes**

2002

when we think of the gardens of southern california we tend to think of the enormous semiarid landscapes of the huntington and rancho los alamos often built on the sprawling grounds of former ranches but there is another garden tradition in southern california the modest rectangular suburban plots

designed by the most famous architects of mid century modernism richard neutra rudolph schindler gregory ain raphael soriano harwell hamilton harris a quincy jones and john lautner these architects saw the garden as an outdoor extension of the space of the houses they designed rather than a neo spanish fantasy to be added later by a landscapist their modern gardens made use of low maintenance drought resistant plants and made room for informal outdoor living by children and adults with an emphasis on recreation and exercise the first book of its kind private landscapes profiles twenty significant gardens and their accompanying houses by these celebrated architects using contemporary photographs by julius shulman and newly commissioned color images along with plans and plant lists private landscapes provides a never before seen look at these gardens as beautiful and practical now as they were 50 years ago these designs continue to provide inspiration for gardeners and designers everywhere

## **The Insurgents**

2013-01-02

a finalist for the pulitzer prize the inside story of the small group of soldier scholars who against fierce resistance from within their own ranks changed the way the pentagon does business and the american military fights wars the insurgents is the inside story of the small group of soldier scholars led by general david petraeus who plotted to revolutionize one of the largest oldest and most hidebound institutions the united states military their aim was to build a new army that could fight the new kind of war in the post cold war age not massive wars on vast battlefields but small wars in cities and villages against insurgents and terrorists these would be wars not only of fighting but of nation building often not of necessity but of choice based on secret documents private emails and interviews with more than one hundred key characters including petraeus the tale unfolds against the backdrop of the wars against insurgents in iraq and afghanistan but the main insurgency is the one mounted at home by ambitious self consciously intellectual officers petraeus john nagl h r mcmaster and others many of them classmates or colleagues in west point's social science department who rose through the ranks seized with an idea of how to fight these wars better amid the crisis they forged a community some of them called it a cabal or mafia and adapted their enemies

techniques to overhaul the culture and institutions of their own army fred kaplan describes how these men and women maneuvered the idea through the bureaucracy and made it official policy this is a story of power politics ideas and personalities and how they converged to reshape the twenty first century american military but it is also a cautionary tale about how creative doctrine can harden into dogma how smart strategists today s best and brightest can win the battles at home but not the wars abroad petraeus and his fellow insurgents made the us military more adaptive to the conflicts of the modern era but they also created the tools and made it more tempting for political leaders to wade into wars that they would be wise to avoid

## **War of Necessity, War of Choice**

2009-05-05

when should the united states go to war it is arguably the most important foreign policy question facing any president and richard haass a member of the national security council staff for the first president bush and the director of policy planning in the state department for bush ii is in a unique position to address it haass is one of just a handful of individuals along with colin powell dick cheney paul wolfowitz and bob gates involved at a senior level of u s government decision making during both iraq conflicts he is the first to take us behind closed doors and the first to provide a personal account the result is a book that is authoritative revealing and surprising haass explains not only what happened but why at first blush the two iraq wars appear similar both involved a president george bush and the united states in conflicts with saddam hussein and iraq there however the resemblance ends haass contrasts the decisions that shaped the conduct of the two wars and makes a crucial distinction between the 1991 and 2003 conflicts the first iraq war following saddam hussein s invasion of neighboring kuwait was a war of necessity it was limited in ambition well executed and carried out with unprecedented international support by contrast the second iraq war was one of choice the most significant discretionary war undertaken by the united states since vietnam haass argues that it was unwarranted as the united states had other viable policy options making matters worse was the fact that this ambitious undertaking was

poorly implemented and fought with considerably more international opposition than backing these are the principal conclusions of this compelling honest and challenging book by one of this country's most respected voices on foreign policy haass's assessments are critical yet fair and carry tremendous weight he offers a thoughtful examination of the means and ends of u.s. foreign policy how it should be made what it should seek to accomplish and how it should be pursued war of necessity war of choice part history part memoir provides invaluable insight into some of the most important recent events in the world it also provides a much needed compass for how the united states can apply the lessons learned from the two iraq wars so that it is better positioned to put into practice what worked and to avoid repeating what so clearly did not
