rare indeed is the artist who is feted by royalty and at the same time sought after by naturalists and scientists as an active collaborator such a painter was pierre joseph redoute born in 1759 on the franco belgian border before redoute was thirty his fame was established in paris where he was to become as renowned as his great neo classic contemporary jacques louis david and highly appreciated and honoured up to the year of his death 1840 even as redoute collaborated with leading naturalists on several books and was rewarded with the title of dessinateur to the institut de france he continued to specialize in roses lilies and lilacs redoute created this collection of masterpieces in 1833 as the pinnacle of his craft in this

lavish work many of the plates were retouched by hand he applied every technique and skill he had perfected bringing art and nature into close harmony a professional of self imposed exacting standards redoute never abandoned the search for beauty and accuracy as this magnificently produced volume shows so well although sales of his works in his lifetime never enabled him to balance his financial problems connoisseurs of his turbulent times acclaimed him the raphael of flowers the rembrandt of roses

excerpt from beautiful flowers and how to grow them there is a charm about a beautiful rose garden which appeals irresistibly to every lover of flowers it is not necessary to win a prize at a rose show to enjoy roses when they are used in free informal natural ways there is a wide gulf between exhibiting and gardening the exhibitor of roses does not keep beautiful garden effects constantly before him and plant and prune in such a way as to form pleasing garden pictures he aims at producing a limited number of flowers of a particular type for this reason people who love roses must not allow themselves to be unduly influenced by what they see and hear at shows they must learn about beautiful garden roses what they are and how to manage them in order to get lovely garden scenes together with abundance of flowers for bowls and vases there should be nothing stiff stilted and formal about roses whether in the growing of them the utilisation of them or the writing about them we should look upon them as cheerful delightful affectionate companions to put the trees in stiff rows grow them on a level and prune them back to mere stumps like a blackthorn hedge is to rob them of all chance of showing whether they possess natural beauty and to write of roses as though they were mere automata devoid of all sentiment of all power of appeal to our finest feelings is to put them on the same plane as mangold wurzels about the publisher forgotten books publishes hundreds of thousands of rare and classic books find more at forgottenbooks.com this book is a reproduction of an important historical work forgotten books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy in rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition we do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works

table of contents introduction white sand drying sand preparation layering of the flowers drying of ferns how to make a fern window decoration traditional german flower smoking method fern outline airbrushing splatter spray card skeletonized leaves for winter decoration conclusion author bio publisher introduction all of these beautiful flowers can be dried so that one can appreciate the beauty even after they have been plucked from their stalks so can their seedpods and foliage drying plants ferns herbs and flowers for use in the future or just for decoration in the house when they are not in season has been en vogue for centuries all over the world wherever there was a thinking man existing who wanted to take advantage of something which could be utilized in the future when that particular plant was not in season and so in order to keep the beauty of flowers along came the idea of drying these plants and to a large number of experimentations over a large number of years using many different mediums more and more people began to learn that yes it was easy for you to dry plans as well as flowers in a natural manner and have them ready within a couple of days or weeks to be preserved permanently in a dried state

there are plenty of methods with which you can dry plants and flowers and this book is going to tell you all about easily done traditional methods which were followed in the 19th century by ladies who did not want to spend lots of money in buying expensive equipment or getting over laden with chemicals in order to do some natural enjoyable activities like drying ferns and flowers and after that these are used in winter decorations in their houses where they were placed in glass containers and jars like had been done in millions of houses down the centuries by other house proud housewives some of these plants were called everlastings or immortelles helichrysums were given the name of everlastings because even after drying they kept their golden pretty color the immortelles belong to the daisy asteraceae family a little bit of experimentation is going to be necessary depending on where you live and the amount of flowers and the varieties you get there everlastings are normally cut when they are still in bud form or before they have reached their full maturity stage they are then placed upside down in any area where you do not have direct or bright sunlight so that they can dry naturally

from the preface the following papers have been written during a last illness which has often made it impossible to examine the specimens i could have wished in the primrose for example i have only been able to make out satisfactorily the drooping aspect of the leaf how this combines itself with the more rigid character in the different stages of the leaf i do not fully understand for the same reason many of the illustrations especially in the chapters on gardening have been selected as being the most ready to hand rather than as the best in my remarks on gardening i have no wish at all to disparage the modern systems my aim chiefly was to point out the faults of modern gardening because its merits are such as it is impossible to overlook lastly in many instances my remarks bear more or less reference to the works of ruskin the greatest and best of art teachers but where i have consciously borrowed from him i have said so these papers are left in charge of a friend for publication forbes watson the pen fell from the hand of my friend when he had written the foregoing lines within two days he was taken home to his father's house this short interval was filled with intense suffering save only during a brief sleep when the flowers of which he had been writing and which loving hands brought to blossom near his bed haunted with their beauty and perfume the unsleeping sense of the imagination and lured him through enchanted fields where in his dream he saw vision after vision of an unutterable glory of floral splendour the ecstasy of his delight in that dream abode with him and lifted a bright light over the few hours of agony that intervened ere he slept again in the peace of death he believed a foretaste had been given him of that which remaineth for them that love god that he whose dying lips were touched with gall had given him a sweeter anodyne in his brief agony the papers published in this little volume were written to solace the languor of the last months of life when a malady which had crept by slow approaches upon him broke down his strength and arrested a professional career which had begun but recently they betoken a mind gifted with quick clear and delicate perception independency of judgment and unsparing truthfulness these were my friend's characteristic gifts they are dimly mirrored in these pages but more clearly in the memory of those who knew him well to them this little volume will be welcome because of him to others perchance it may be welcome for the worth it has because it tells of the beauty there is in god's fairest frailest handiwork in flowers and bears some trace of the rarer amaranthine beauty of a soul which wore the white flower of a blameless life j b p

the story of australian art does not begin and end with landscape this book puts flowers front and centre because they have often been ignored in preference for more masculine themes departing from where studies of single flower artists leave off useless beauty embraces the general topic of flowers in australian art and shines new light on a slice of australian art history that extends from 1880 to 1950 it is the first book of broad chronology to discuss australian art through blossoms which it does by addressing stories of major figures including hans heysen margaret preston and sidney nolan as well as specific objects such as surreal flowers aboriginal flowers and war flowers whether modern or conservative the artists in this study shared an intellectual and emotional passion for flora this was true for men as well as women despite blossoms being a more traditionally feminine subject through spectacular reproductions of

historical and contemporary artworks drawn from collections in australia the united states britain and new zealand useless beauty explores how flowers influenced the psyche governed rituals defined identity and brought a psychological dimension to the everyday the peak years for flower centricity in australian art were between 1920 and 1940 when flowers were known as the apotheosis of useless beauty
