Award, 19 February 1968 1968 master s thesis from the year 2010 in the subject geography earth science meteorology aeronomy climatology grade excellent course masters language english abstract traditional approaches provide only limited opportunities for general analysis of tectonic structure however geographic information system provides unique opportunities for solving a wide spectrum of problems related

to analyzing earthquake phenomena gis can also provide an effective platform for data assortment organization and research with multidirectional data sets in addition gis can also provide an effective solution for integrating different layers of information in this research an interactive diversified seismological geological and geographical digital database has been developed for pakistan using this gis database a better understanding of the tectonics and crustal structure of the region is possible with the help of this database we have compiled new maps of seismological parameters depth to moho p_n velocity and p_g velocity the developed gis database would help us in natural hazard evaluation seismic risk assessment and understanding of earthquake occurrences

Application of Geographic Information System (GIS) for the study of Tectonic Plates in Pakistan 2014-06-02 pakistan and its neighboring counties contain all recognized kinds of most important plate boundaries as well as important dynamic intra plate twists understanding the tectonics in this multifaceted area has been delayed by a relative lack of data and the difficulty of geologic and tectonic troubles even with the raise in the quantity of data in the past few years the complications of the area need a multidirectional approach to cope with the geology and tectonics thus in order to assemble huge multidirectional data sets with varying superiority and resolution this study takes on a geographic information system gis approach to see at these troubles in a comprehensive and exceptional way in this study the authors compile maps of surficial tectonic features and deepness of the moho p_n velocities and p_g velocities for pakistan and explain a cross section means to work with data in a gis format

India-Pakistan Boundary 1968 pakistan and its neighboring counties contain all recognized kinds of most important plate boundaries as well as important dynamic intra plate twists understanding the tectonics in this multifaceted area has been delayed by a relative lack of data and the difficulty of geologic and tectonic troubles even with the raise in the quantity of data in the past few years the complications of the area need a multidirectional approach to cope with the geology and tectonics thus in order to assemble huge multidirectional data sets with varying superiority and

resolution this study takes on a geographic information system gis approach to see at these troubles in a comprehensive and exceptional way in this study the authors compile maps of surficial tectonic features and deepness of the moho pn velocities and pg velocities for pakistan and explain a cross section means to work with data in a gis format

Dera Ghāzi Khān District Map 2006

Mapping of Earthquake Prone Areas: Earthquake and Its Assessment 2014-08 includes entries for maps and atlases Mapping of Earthquake Prone Areas: Earthquake and its assessment 2014-08-01 a study of medicinal and aromatic plants maps was conducted from september 2007 to april 2008 in different sites of district chitral pakistan the objectives of the study were to identify alternate livelihood opportunity for the local people and to investigate linkages in the market channel starting from collectors to consumers information was collected through semi structured questionnaire the survey revealed 60 species of plants with high therapeutic and economic value these plants were used for the curing of various diseases in traditional system of medicines the study showed that neither men nor women were aware of the vast array of herbs with medicinal properties that exist in their locality it was also noted that the trade of map is highly uncoordinated and complex involving many players out of 60 map total 13 species of maps are collected for sale purposes which are mostly collected by children and women the collectors are not properly trained and do not have any marketing skills or access to larger markets and are often not aware of the high market value as a result most of collected materials are sold to local middlemen at a very low price

Records of the Geological Survey of Pakistan 1994 bannú or our afghan frontier is an account of bannu district in british india located in present day northwestern pakistan the bannu valley was seized by the east india company in 1848 and the district formed in 1861 the author septimus smet thorburn was an official in the indian civil service and the settlement officer in the district the book is in two parts part one consisting of six chapters covers the geography history and administrative system of bannu with emphasis on british rule and its interaction with local traditions

customs and patterns of authority and land tenure and ownership part two which comprises the bulk of the book deals with customs and folklore it includes an introductory chapter entitled social life customs beliefs and superstitions of the peasantry and separate chapters devoted to popular stories ballads and riddles and pashto proverbs translated into english the final chapter gives the texts of the same proverbs 406 in all in pushto the stories ballads and riddles are brief generally a few paragraphs and are classed in five categories humorous and moral comic and jocular fables marwat ballads relating to the pushto marwat tribe living in bannu and riddles the proverbs are grouped according to the topics to which they relate for example begging boasting bravery and so forth and for many of the proverbs a brief explanation is given of its meaning and application a short appendix deals with the complicated system of land allotments in the different tappas traditional subdivisions of the bannu region the book includes a map of the bannu district with an inset map showing its relationship to the neighboring parts of afghanistan and the regions of waziristan kashmir and the punjab

CENTO Summer Training Program in Geological Mapping Techniques 1968 international law reports is the only publication in the world wholly devoted to the regular and systematic reporting in english of courts and arbitrators as well as judgements of national courts

Map of Mainland Asia by Treaty 1975 few dimensions of dealing with pakistan are the source of as much frustration as the tribal areas bordering afghanistan the subject of this council special report commissioned by the center for preventive action daniel markey analyzes the unique challenges of this region which has long been largely outside pakistani government control he argues that the united states must work with islamabad to confront security threats and improve governance and economic opportunity in the federally administered tribal areas fata something that could reduce militancy the report lays out a cooperative incentives based strategy for the united states that would aim to increase the capacity of the pakistani government and its security institutions foster political and economic reform and build confidence in the bilateral relationship at the same time the report outlines alternatives to be considered should this

positive approach fail to advance u s interests these alternatives be they coercive sanctions to induce pakistan to act or unilateral u s action against security threats could bring some short term progress in dealing with significant threats but at the cost of bringing about a more hostile pakistan that would cease to be a partner of any sort

Publication Catalogue, Geological Survey of Pakistan 1985

this book identifies reforms that can help manage environmental priority problems associated with transport s impacts on air quality noise pollution road safety hazardous materials transport climate change and urban sprawl the policy options are contextualized in light of the government of pakistan s 2011 framework for economic growth and its strategic objectives appendixes a d present additional background information describe the economic and institutional analyses undergirding this report and detail the report s methodology this analytical work by a team of world bank specialists focuses on analyzing the policy and institutional adjustments required to address environmental social and poverty aspects of increased transportation efficiency in pakistan identifying policy options for the government of pakistan to better serve the population to enhance social cohesion and to foster equitable benefit sharing with low income or other vulnerable groups developing a broad participatory process to give a voice to stakeholders who could be affected by enhancements of freight transport productivity and making robust recommendations to strengthen governance and the institutional capacity of agencies to manage the environmental social and poverty consequences of freight transportation infrastructure

Report on Survey and Settlement Operations in the Province of East Pakistan 1960 offers a pioneering study of state making religion and development in contemporary pakistan and its northern frontier

West Pakistan in Maps and Statistics; Or, Geographical & Economic Atlas of West Pakistan of Today & Tomorrow 1948 the smart book contains information designed to enhance soldier s knowledge of pakistan including history politics country data and statistics and the military operational environment the smart book concludes with an overview of the culture of pakistan including religion identity behavior communication and negotiation techniques an overview of ethnic groups a

regional breakdown outlining each province a language guide
and cultural proverbs expressions and superstitions
