what makes good people capable of committing bad even evil acts few psychologists are as well qualified to answer that question as philip zimbaro a psychology professor who was not only the author of the classic stanford prison experiment which asked two groups of students to assume the roles of prisoners and guards in a makeshift jail to dramatic effect but also an active participant in the trial of a us serviceman who took part in the violent abuse of iraqi prisoners in the wake of the second gulf war zimbaro s book the lucifer effect is an extended analysis that aims to find solutions to the problem of how good people can commit evil acts zimbaro used his problem solving skills to locate the solution to this question in an understanding of two conditions firstly he writes situational factors circumstances and setting must override dispositional ones meaning that decent and well meaning people can behave uncharacteristically when placed in unusual or stressful environments secondly good and evil are

not alternatives they are interchangeable most people are capable of being both angels and devils depending on the circumstances in making this observation zimbardo also built on the work of stanley milgram whose own psychological experiments had shown the impact that authority figures can have on determining the actions of their subordinates zimbardo's book is a fine example of the importance of asking productive questions that go beyond the theoretical to consider real world events

this is a reading of physical obsession in o connor through linguistic and literary techniques central struggle between spirit and matter in o connor through a close quantitative examination of the interactions of grammatical voice and physical bodies in her texts bridging literary theory and linguistics hardy demonstrates that the many constructions in which the body parts of o connor's characters are foregrounded either as subjects or objects are grammatical manipulations of semantic variations on what linguists deem the middle voice roughly indicating that the subject is acting upon himself or herself productive approach to understanding o connor's use of the body and its parts in her explorations of the sacramental and the grotesque linguistic analysis of grammatical middle voice is coupled with quantitative analysis of body part words and the collocations in which they appear to present a new point of entrance to understanding o connor's stylistic manipulations of the body as central to the rift between spirit and matter through this method of reading o connor hardy makes a valuable contribution to the growing body of work that is introducing linguistic terminology and concepts into literary studies
