The Paris System for Reporting published by Springer 2009

Urinary Cytology 2022-02-03

the first edition of the paris system for reporting urinary cytology introduced a completely new paradigm for detecting bladder cancer by urine cytology this system concentrated on defining morphological characteristics of the most clinically significant form of bladder cancer high grade urothelial carcinoma this new approach has been widely accepted throughout the world and has become part of the daily practice of cytology considering that the first edition of the paris system tps introduced a new model of urinary cytodiagnosis verification and expansion of initial material and data were anticipated based on evolving knowledge and readership requests the group of highly experienced authors have created a new edition of tps this second edition includes areas and issues not originally covered a new chapter on urine cytology of the upper tract a rarely addressed topic has been introduced furthermore the issue of cellular degeneration is discussed in the criteria of all diagnostic categories examples of standardized reports are included in each chapter most importantly a separate chapter presents data defining the risk of malignancy rom for each diagnostic category to inform clinical management new high quality images augment those of the first edition to better illustrate diagnostic clues and potential pitfalls in addition to chapters on diagnostic criteria current concepts of pathogenesis of bladder cancer specimen adequacy and preparation and ancillary tests are covered in separate chapters a bonus to the volume is a comprehensive history of urine as the earliest diagnostic definition human disease richly illustrated with artwork and major museums written by internationally recognized authorities this comprehensive and evidence based guide

The Bethesda System for Reporting Cervical Cytology 2015-04-13

this volume describes a uniform international approach for classifying and reporting salivary gland and thyroid samples the new reporting system is evidence based using data from the literature as well as upon the experience of a multi disciplinary group of leading experts involved in the field of salivary gland and thyroid reporting thyroid cytopathology definitions criteria and explanatory notes
2010 edition
published by
springer 2009

the bethesda system for reporting thyroid cytopathology definitions criteria and explanatory notes 2010 edition
cytopathology each diagnostic category of this novel
salivary gland reporting system includes detailed
descriptions of the cytologic criteria as well as a
comprehensive set of photomicrographs demonstrating all
of the key microscopic features along with annotated
descriptions for each image designed as a practical
book with easy readability the milan system for
reporting salivary gland cytopathology combines the
high quality images of an atlas with a logical approach
described in concise text form and in line drawing
algorithms it presents for the first time an
international cytologic reporting system for salivary
gland lesions designed and endorsed by a panel of
experts in the field

The Bethesda System for Reporting Cervical Cytology 2015

the bethesda system was developed at a national cancer
institute sponsored workshop in december 1988 to
provide uniform diagnostic terminology that would
facilitate communication between the laboratory and the
clinician the format of this report includes a
descriptive diagnosis and an evaluation of specimen
adequacy a second workshop was held in april 1991 to
evaluate the impact of the bethesda system in actual
practice and to amend and modify it where needed one of
the major recommendations of this second meeting was
that precise criteria should be formulated for both the
diagnostic terms and for the descriptors of specimen
adequacy that is the intended purpose of this report

The Bethesda System for Reporting Thyroid Cytopathology 2010-03-20

experts estimate that as many as 98 000 people die in any given year from medical errors that occur in hospitals that s more than die from motor vehicle accidents breast cancer or aidsâ three causes that receive far more public attention indeed more people die annually from medication errors than from workplace injuries add the financial cost to the human tragedy and medical error easily rises to the top ranks of urgent widespread public problems to err is human breaks the silence that has surrounded medical errors and their consequenceâ but not by pointing fingers at caring health care professionals who make honest mistakes after all to err is human instead this book sets forth a national agendaâ with state and local implicationsâ for reducing medical errors and improving patient safety through the design of a safer health system this volume reveals the often startling statistics of medical error and the disparity between the incidence of error and public perception of it given many patients expectations that the medical profession always performs perfectly a careful examination is made of how the surrounding forces of legislation regulation and market activity influence the quality of care provided by health care organizations and then looks at their handling of medical mistakes using a detailed case study the book reviews the current understanding of why these mistakes happen a key theme is that legitimate explanatory notes concerns discourage reporting of errorsâ
