game feel exposes feel as a hidden language in game design that no one has fully articulated yet the language could be
compared to the building blocks of music time signatures chord progressions verse no matter the instruments style or
time period these building blocks come into play feel and sensation are similar building blocks where game design is
concerned they create the meta sensation of involvement with a game the understanding of how game designers
create feel and affect feel are only partially understood by most in the field and tends to be overlooked as a method or
course of study yet a game s feel is central to a game s success this book brings the subject of feel to light by
consolidating existing theories into a cohesive book the book covers topics like the role of sound ancillary indicators the
importance of metaphor how people perceive things and a brief history of feel in games the associated web site
