there has been a recent worldwide move towards demanding evidence based policy and practice in education with policy makers and practitioners wanting more practical and coherent answers from research funding schemes such as the international initiative for impact evaluation the us institute of education sciences and the educational endowment foundation in england have been set up to provide the kind of robust practical evaluation research that more traditional funders â such as the research councils and charities in the uk â have tended to ignore there are even new funding streams such as the pupil premium for schools in england allowing schools and others to take advantage of the new evidence generated by implementing evidence based reforms this book presents innovative methods for the design conduct analysis and use of evidence from robust

inquiry has been an important part of educational theory and practice for the last decades as in other competence oriented approaches to teaching and learning the appropriate support and assessment of the students competences has been much debated in the context of inquiry based science education one way to support and assess students in their learning is formative assessment the concept is also known as assessment for learning which means that the information on the students levels of achievement is not used for grading but for planning the next steps in teaching and learning the use of formative assessment methods as a means of support for students learning is promoted in national and international position papers and reports however in the swiss teaching practice formative assessment particularly formal formative assessment methods which involve a certain degree of pre definition planning and formality are not widely used nor researched therefore the focus of this study is on exploring possibilities and challenges for the implementation of formal formative assessment methods in the context of inquiry based science education in switzerland the emphasis of the study will be on the teacher

reader beware this book and author may appear to be incongruities but is it so strange that the same person should assume the role as both real estate investor and a public school teacher to escape retirement on welfare and starting with nothing i describe how i was able to build equity of well over several million dollars while continuing to teach public school happily i was rewarded with the privilege of teaching children for 30 years and my classroom adventures are included within these pages then it is wrong to praise freedom in our free enterprise system while deploring the status of so many teachers whose classroom lives and ability to teach are ground out by the dictatorial policies of the educational bureaucracy on the contrary i believe it is imperative that the truth be told for the good of us all these are my memoirs
